

DAFss

1. Brush guard over tail lights. I like. Does this come with my kit?

2. I have seen some jeeps where the back looks lower than front, from the side. I don't like this. I want my jeep's front and back the same height. (level)

3. I want to see mock-up (drawing of dash) before cutting begins. Might change placement of the speakers.

4. Which bumper? I choose the first bumper (the small picture) but was looking at other jeeps on your site. The reason I choose this is because I was thinking the winch would be in between the open space. It looks like the position of the bumper will be lower and the space not used so then I would want the bumper in the second picture that is on the jeep. I'm I correct?

5. (The next two pictures) What is this setup? I'm looking at the shocks that are side-to-side.
